I designed this small Wall clock for a friend of mine. I think it turned out awesome so I want to share it.

For me the pieces fit perfectly, without any post processing.

If they are too loose for you, you might just want to glue them.

To get the two colors into the minute and hour-hand, I stopped the print at a specific point and changed the color.

It's designed to fit a printer with a 200mm x 200mm printbed.

I used a Clockwork with these dimensions:

Housing: 56mm x 37mm x 56mm

Shaft length: 17mm

Shaft diameter: 8mm
