Give your Tronxy X3 printer a lift by adding these shapely legs. Lifts it high enough (80mm) to have the control box fit under it.

Not a perfect solution, but it's good enough.

UPDATE: Added per request an even taller one. This elevates the printer 115mms from the very bottom.

Print Settings

Printer:

Tronxy X3

Rafts:

No

Supports:

No

Resolution:

0.2-0.25mm

Infill:

20% honeycomb

Notes:

3 perimeters or shells. Use a brim if your parts do not stick well to your bed.

M3 and M4 versions only changes the hole size.

About 7h35m for a set.

Post-Printing

To attach, you need 8 total (2 per leg) 8-12mm M3 or M4 screws with same size drop in T-nuts.
