After designing a better hotend cooling system for my Tronxy X3, the x endstop was now in the way. Never really liked how it was mounted anyway, so I created this.

Works well with this X3 Supercooler: <http://www.thingiverse.com/thing:1906391>

UPDATE: this does need to be printed with supports. Fort got to check that when I posted this part so long ago. (Hat tip to micksharpe.)

### Print Settings

#### Printer:

Tronxy X3

#### Rafts:

No

### Supports:

Yes

### Resolution:

0.2-0.25mm

### Infill:

30%

### Notes:
