Summary

I wanted to rise the light from the wall.

I liked this light (204.286.47) on the internet and wanted to install it in my bathroom. It looks perfect above the mirror (LOTS, also from Ikea, of course)

But there were tiles on the wall, so switches were hard to reach, and I wanted cable from the side. Two birds with one stone - a platform!

It fits on the buildplate! But you will have to find the right angle 😊
