This is a simple mount to attach a 250V 12A softstart modul KR-009 or the 16A ZLB to a Scheppach mitre saw HM90SL without making any permanent changes to the saw.

Just unscrew one screw that holds the bladecover, add the mount and rescrew. You can use a cablestrap to protect the wires.

Edit as of Sep 26, 2023: Added bigger mount for ZLB 16A. 12 A Version burned out two times.

As usual, OpenSCAD included for easy adaption.

Have fun!

Cheers

Armin
