Summary

A part to hide the cables from your Fritzbox

[Household](#) > [Other House Equipment](#)

Tags: [cover](#) [fritzbox](#) [7590](#)

My router sits right above a cable gland and all the network stuff is on the other side of the wall. To hide the cable gland and the cables i designed this cover, which fits between the round things on the 7590 but doesn't cover the ventilation openings.

I printed mine in transparent PETG without supports.
