Summary

Recreation of a whitelabel roof window locking plate.

[Household](#) > [Other House Equipment](#)

Tags: [window](#) [lock](#) [roof](#)

A near exact replacement for a whitelabel locking plate for a roof window. Sits in two holes of 60mm in the wooden frame of the roof window. Three slits, two for ventilation and one for fully closed.

The original plate was starting to disintergrate, so I measured, designed and tried, ... measured some more, tried some more... and finally it was finished.
