Summary

Stylish handle makes 2-liter bottles easy to handle.

[Household](#) > [Kitchen](#)

Tags: [waterbottlehandle](#)

2-liter soda bottles invariably take two hands to handle. This stylish handle lets you one-hand these bottles with ease. Handy! Reuse your bottle as a watering jug, or maybe as an elegant table carafe.

The model consists of two parts: a band which slips over the straight section of your bottle, and the handle with a tapered slot. Sliding the handle slot onto the ends of the band pinches the band together tightly and holds everything together securely with a friction fit. No glue, no fasteners. Disassembles just as easily.

The model is scaled for a standard 2-liter bottle (110mm dia., nominal), but you should be able to scale it up or down for different sized bottles. Prints without supports. Use a 0.4mm line width for optimal printing. The handle prints standing upside-down, but there is a small partial brim built into the model to keep it secured to the bed as you print its full height.
