updated 24. 3. 2022 | published 24. 3. 2022

### Summary

a little performance boost and "keep-your-hand-safe" thing

[3D Printers](#) > [3D Printers - Upgrades](#)

Tags: [fan](#) [fanshroud](#) [fancover](#) [coolingfan](#) [40mmfan](#)

This is my version of a combined fancover and fanshroud. it boots the fan a littlebit, as it reduces the side turbulences of the fanblades. and it keeps your hands away from the little sharp speedy things...

two versions - a better looking and a straight for better printing. both come with integrated support!
