EN:

A pen holder that can also be used as a pen holder. I use it for my XPEN tablet because I don't have a holder for my pen.

Not recommended for PLA but still works. Use PETG or other material instead.

FR:

Un porte stylet pouvant aussi bien servir de porte stylo. Je l'utilise pour ma tablette XPEN car je n'est pas de support pour mon stylet

Déconseillé en PLA mais fonctionne quand même. Utilisez plutôt un PETG ou autre.
