I designed this Spool Holder for my Ikea Kallax, where my printer rests on so I can add more filament spools, if i need one. This is mainly for storage, but feeding from them should also work.

There are two versions in the 3mf file: Left and Right. Print the one you need and delete the other one or print both.

I know this is a very specific use case, but maybe some poeple will appreciate it and it helped me a lot for quick access. Feedback welcomed.

Happy Printing!

Quick timelapse of the PETG Gcode :)
