Fruit washer bowl

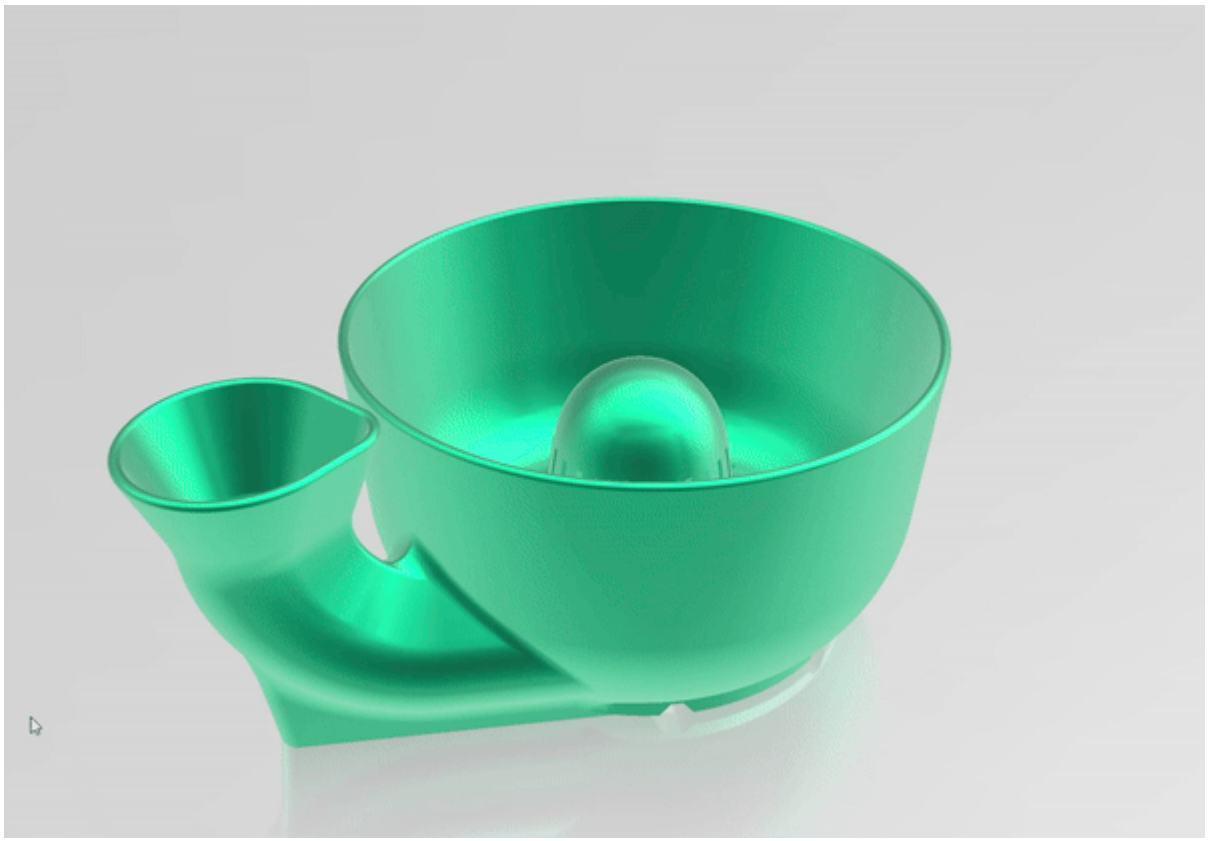
I received a request to model such a tool for washing fruit with water. I also like blueberries, for example, so a bowl like this would be perfect for me.

Recommended only for short-term contact with food, better to use PETG material, or filament suitable for food contact.

Update model !!

Slightly reduced drain holes to prevent water from draining quicklyNo support!

The bowl has a **diameter of 130mm** and a **height of 75mm**, but you can **scale it + - 20%**



I make all my models for you for free, but if you would like to support me, you can become a member of my club!
