Hydroponic Plant Basket for 75G Marineland Aquarium. Fits perfectly in the space between the glass lid and the back glass panel. One section perfectly fits 1x regular, 2x long, and 1x extra long plant basket. The basket reaches the bottom of the aquarium rim. The bottom of the basket will just touch the surface of the water if you fill the aquarium to the bottom of the aquarium rim. If you have an aquarium lid, the humidity that escapes through the basket should be enough to keep the plant roots healthy.

Non-printed parts:

- Expanded clay balls (most hydroponic growth media should work fine)

- Plant cuttings (Monstera minima, neon pothos, and monstera adansonii)

Printer: Prusa i3MK3s and Prusa Mini

Resolution: 0.30 and 0.25

Supports: No (will string a little, but I don't think the plants mind)

Infill: 50%

Material: Prusa PLA Orange and Hatchbox PLA Black
