

Smiling stars

[VIEW IN BROWSER](#)

updated 24. 3. 2022 | published 24. 3. 2022

Summary

Smiling star(s), color change print with highlighted face.

[Art & Design](#) > [Wall-mounted](#)

Tags: [star](#) [glow](#) [night](#) [sky](#) [glowinthedark](#) [ceiling](#)
[fluorescent](#)

Info:

- just like original from from [@Bris](#) (thanks a lot for design, it is great)
 - ment for glowing filament
- but without the “effect of 4 eyes”, because for me, it looks like it has 4 eyes

Sizes:

- i added multiple sizes
- sure, you can have 1 size and just scale it
 - but in those different sizes uploaded, eyes and mouth are not scaled with overall scale (if it matches the area of a star), so those sizes are different, than just a simple downscale

Print info:

- easy print
- color change is set in 3mf files

This remix is based on

Little smiling star

by Bris

Model files

stars_multiplesizes.3mf

star_xl_blank.stl

☐ No face star, just a blank one, something else can be put on it, like a letter.
