If you want to support me you can now **nominate me and my designs** for the **Printables Awards 2025! :)**

The design consists of **5 parts** and is **fully support-free**, making it easy and efficient to print. It features **two independent clamping mechanisms**:

- One clamp securely attaches the vise to your table
- A second clamp holds the workpiece firmly in place

A **circlip** is included in the design to keep the screw securely positioned during use, ensuring smooth and reliable operation.

The vise fits tables with a **maximum thickness of 40 mm**, making it suitable for most desks and workbenches.

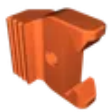

A handy and practical tool to keep your workspace organized and your parts steady while you work :)
