Summary

This is my version of the Martian helmet

Costumes & Accessories > Cosplay & Costumes in general

Tags: helmet

My version of the helmet from the Martian. I never had the opportunity to see the original in person so this is done from watching the movie many times and represents my best estimate of size and proportions. Some adaptations for 3D printing like the larger lettering on the outside of the helmet. I never succeeded in making a decent dome so if anyone endeavors to make one please let me know. A lot of files, so let me know if there are problems as I did most of this some time ago. Orient parts so that they print best on your printer. Details about the building, paints, etc are in a build thread on the therpf.com forum: https://www.therpf.com/forums/threads/new-martian-helmet-model-and-build.299988

I like to use PETG as it is easy to work with and behaves nicely when wet sanded.

I will ad more info here over time. The decals are up as pdfs. Have fun making.
