USE AT YOUR OWN RISK!!! I made this when I was new to CAD design and did not have 3D printer of my own. PLEASE USE SOMEONE ELSE'S DESIGN THAT WORKS...

WARNING: It's a little too large, as in the HIRs are loose inside... I will update this with a fix.

Tired of loading High Impact Rounds one at a time? Use the autoloader to load all 5 at once!

The design is my own, but it was inspired by others like FoamTechnician's autoloader.

Same as the Nerf Kronos Autoloader, but for printers with less height.

## Post-Printing

### After Printing

Sand all surfaces well, and glue the large cylinder together after inserting the pusher in the notch.

Category: Toy & Game Accessories
