Well needless to say the toilet handle broke one night and the hardware store was closed.

so what do you do ?? make a replacement in cad really quick and print it up on your 3d printer of course.

Ahh the joys of 3d printing a daily used object is great.!!

Print Settings

Printer:

home made

Rafts:

Doesn't Matter

Supports:

Yes

Resolution:

0.20 or higher

Infill:

20% or higher
