My wife cracked the handle for her spatula. Upon further inspection it was apparent that the spatula head, made of a silicone like material, can be removed from the handle some measurements were taken of the original handle and a few minutes were dedicated to cad work done in Freecad. I have included the Freecad file to adjust to your liking.

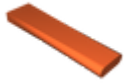

This was printed on my mpselect mini V2 in Polymaker's PLA pro.

I hope you find this useful and happy printing!
