Això és una llum led autoportant per un multi-connector tipus dau. O també hi ha l'opció de motar-ho a la paret.

This is a self-supporting led light for a wall-mounted dice multiplug style. Or there's also a wall mount adapter.

Print Settings

Printer Brand:

Anycubic

Printer:

All-metal Mega

Rafts:

No

Supports:

Yes

Resolution:

0.24 as a maximum

Infill:

20-40

Filament: Any PLA or PETG Any

Notes:

Molt simple, però funciona molt bé, té rotació pivotant horitzontal + els moviments dels braços per poder orientar-la bé.

Hi ha els arxius de les peces dissenyades en format .STL i l'arxiu de Fusion360 per si algú vol modificar-ho al seu gust.

Very simple, yet it works great, as a feature it has horizontal pivoting movement + adjustable arms so it can be nicely focused to your desire.

You'll find all .STL files with all parts I designed and also Fusion360 file in case someone wants to edit and adapt to his/her own taste.
