This is a round shield for Dummy 13. It prints in two pieces, grip and shield. The 2 fit together with a press fit. (Maybe apply some glue since after a while it gets kinda worn out) The shield is about 48x48mm and 2.6mm thick (6mm in the middle).

I recommend just printing the "shield and grip.stl" with the "0.15mm Speed" profile in Prusaslicer, no changes needed.

Also check out the rest of the arsenal I made, the files can be found on my profile :)

If you'd like to request a different shape or a different accessory all together, please feel free to reach out! (I don't promise anything lol, just happy to help out)

(also works for Lucky 13, Easy 13 and Mini 13)
