This is a replacement part for the Turtle Beach Stealth 700 Gen 2 headset. My headset is for Playstation, but it should work for any 700 gen 2. This was modeled for the left side of the headset, but I would think mirroring the model should make it work for the right side.

I've had the best results printing this with ABS-Like Resin. Standard resin will break within a week from my experience. FDM Plastic printers can not print this part standing up or else the swivel section on top will snap along layer lines.

Edit: added a "thicker" version by reducing the wire hole on the swivel by .5mm

# Model files

**turtlebeach700g2.stl**

**turtlebeach700g2\_thicker.stl**

☐ Reduced hole size for wires by .5mm
