Update 2018-01-01 -- As it turns out, the detailed Doomguy model that I remixed into this project had initially been uploaded to Thingiverse without the permission of the sculptor (Crazed Sculptor, YouTube channel here: <https://www.youtube.com/user/b1938dc/feed>). To honor his wishes that it not be distributed, I have removed those models from my remix. Instead, I have included a replacement version that uses the original in-game model for anyone who wants to try making their own electronic figure. Credit to danne8_6 for extracting the in-game model (<https://www.thingiverse.com/thing:1624483>).

Original Description -- Shortly after I started playing Doom (2016), I set out on a quest to create a real-life version of the hidden collectible Doomguy

figurines. There's quite a few 3D printable options (see the remix source list!). But...more than that, I really wanted it to play the Doom theme just like it does in the game when you pick it up.

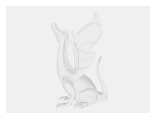

See here for build video: https://www.youtube.com/watch?v=__2k-Lft820

This version adds space for a speaker, pushbutton, battery, and ISD1820 PCB -- these can be found for about \$6 on [Amazon](https://www.amazon.com/SUNKEE-recording-telediphone-Microphones-Loudspeaker/dp/B01I37DBNE/): <https://www.amazon.com/SUNKEE-recording-telediphone-Microphones-Loudspeaker/dp/B01I37DBNE/>
