updated 11. 1. 2023 | published 11. 1. 2023

### Summary

Holds 4 nozzles, with the "fully loaded kit" in mind as they are labeled 0.25, 0.4, 0.6 and 0.8mm.

Nozzle holder for E3D Revo. Holds 4 nozzles, with the "fully loaded kit" in mind as they are labeled 0.25, 0.4, 0.6 and 0.8mm.

It was designed to be mounted on aluminum profiles, but it stands pretty well on its own as well.

You will need at least 2 M3 short screws (designed for countersink) and t-nuts, but 4 screws are recommended for a more secure installation.

You can get the design from here: <https://cad.onshape.com/documents/dcf67ff354e5ec57248b1ff1/w/bf86a7883ea6c252a2037001/e/ad9e8d5473f286109fbcf946>

EDIT: I've added a version with the initials of the colors.

EDIT 2: I've increased a little bit the size of the holes for the screws, since they were too tight. It's only updated on the version with the color initials.
