[betterextruder](#)

Better Extruder Design for the CL 260 3D Printer or other Printers. Fast Flexfilament printing is possible with that extruder. I print TPU with PLA speed. It is also able to print with inconsistent (diameter) Filaments.

(!!! Need to be scaled down !!! Old Version)

Tadly scaled it down to the right size! Thanks you ! :) <https://www.thingiverse.com/thing:2598633>

## Print Settings

### Printer:

CL 260

### Rafts:

Doesn't Matter

### Supports:

No

Category: 3D Printer Extruders
