updated 25. 12. 2022 | published 25. 12. 2022

Summary

holds up to 12 nozzles. I have it in my maintenance drawer, so intention was to make it small and low profile

[3D Printers](#) > [Accessories](#)

Holds up to 12 nozzles. I have it in my maintenance drawer, so intention was to make it small and low profile.
Have fun collecting nozzles.

No special print instructions.

Additional notes

I'm interested in your feedback to improve my stuff! So give me likes, post makes, comment and rate the print to show others and me how well it goes.

If you post a make, let me know which filament you use.

If you want to support me by donating a coffee go to <https://ko-fi.com/antimaterie> I would really happy about it. The money will be invested in all stuff regarding 3d printing to give more and better quality models.

In general my Prints are not for commercial use, but if you are a print farm owner and want to sell some of my stuff, please contact me.

Hope you enjoy my models.
