This holder could be attached with a cable strip at your bike or scooter or something else.

It's unobtrusive, and if you stick a reflector on the lid, you can hide that there is an AirTag is inside.

A little bit support is needed for the parts, except the lid.

Feature:

- The lid of the holder has a small groove for an o-ring to be more water protected (see picture).

- The holder has a bayonet lock to protect the AirTag from being lost.
(You may see it on the pictures of the holder and lid parts)

Additional parts:

- M4 12-14mm metric screw
- Cable Strip
- O-Ring 41mm diameter, 2mm thickness
