Summary

A token mat replace for Dominion that replaces all individual player mats through Dominion Allies.

As much as we love playing Dominion, it's always a pain to constantly swap token mats when playing random games. Also, so many token mats are overkill for what they hold. With that in mind, I created a universal token mat that holds any tokens you might have through Dominion Allies. I've also included a storage area for all the chits for Dominion Adventures and an area to store debt tokens. Each area is labeled with an icon denoting what it should hold.

2 different versions. 1 with some rounded divots and a fillet on the bottom and 1 without with a chamfer on the bottom which will be used in a future project.

Tray areas include:

Bottom row from left to right - Victory Points, Coffers, Villagers

Top row from left to right - Pirate Ship, Favors, Adventure Chits, Debt

All print with no supports needed. Tested in PLA. For ours I used 3 different PLAs and to make the icons pop and match the colors that each of us use most often.

If these appeal to you, please print and share feedback. I'm very much a design novice, so please share any feedback or suggestions you might have!
