My friend creates board games and needed some customized meeple so I made some battle meeple. There is one with a sword and shield, one with only a shield, and one with a bow. I incorporated designs from Maker Murph( <https://www.prusaprinters.org/prints/120811-shield-toggle> ) for the shield, williamdecker88 ( <https://www.prusaprinters.org/prints/110582-desktohero3d-swords> ) for the sword, and the meeple is from <https://www.thingiverse.com/thing:403964/files>. (update 1.6.23- this link appears to be dead)

The archer model can only be printed in its current orientation or else you may encounter empty layers.
