I made a remix of <https://www.thingiverse.com/thing:2401227> made by otinex to make it printable in 3 colors without mmu and with changing of the filament only.

Reading is growing up is also possible just use red instead of green ;)

I would define this as a remix but I would have to define the parent and the website can not even find it when providing the url. I told you the original url here ;)
