It's a redesign of the CR10_E3DV6_MANUAL_BASE_V7.5.stl part from petsfang v2 (<https://www.thingiverse.com/thing:2759439>)

This new part fit the specific Funssor CR10(-S)/Ender replacement carriage available on aliexpress here <https://www.aliexpress.com/item/32961475769.html>

The hotend's mounting brackets are longer than the original creality model.

They are 5 mm long, which is why I redesigned this part.

The part has been redesigned from scratch because I do not have access to the creator source file. There may be some minor differences.
