Summary

A stand-up version of the Ukrainian Coat of Arms

A version of the Ukrainian coat of arms on a small stand up base. It isn't quite a Javelin or Stinger, but hey, just display the solidarity and your love.

Fusion file is uploaded as well for whatever remixes you may need. Fusion file also includes an inverse concave version of the same profile.

Uploaded .3MF filed is scaled for a print that is about the size of a business card. You can do eight at a time on a MK3, face down.

PS: I know the trident portion is supposed to be yellow, I didn't have any yellow filament on hand so I used the other national color in print featured in example photos here.
