Summary

Holder/waterer for the little biodegradable Seed Starter Pots.

I tend to break up the roots when transferring seedlings from little indoor pots to bigger pots or the garden, so I rely on those little biodegradable pots you can get from the hardware store. But watering them packs down the soil, and seems to delay sprouting. So I made this to nestle the pots into and allow watering from the bottom. So far it has been working very well for me, so I thought I would share.
