A SpaceX “Starman” Astronaut Helmet for [Lucky13](#), [Dummy13](#) or [Easy13](#)

Print with white PLA or PETG and use a black permanent marker to color the visor. You need a little bit support on the bottom (see Prusaslicer project file)

Two sizes available: normal and big

The normal one has relative realistic proportions to the rest of the body. Use the big helmet for a bit more cartoon-ish look.

For the rest of the Lucky 13 figure:

The original parts can be found [here](#).

If you have trouble with bed adhesion for the tiny parts and don't want to use a brim, try [this](#).

Blender files for the helmet are available.
