updated 26. 3. 2022 | published 26. 3. 2022

### Summary

I have already used the original several times, but have now needed more space (for a level shifter).

Tags: [case](#) [led](#) [jack](#) [level](#) [ws2812](#) [controller](#) [wemos](#)  
[esp8266](#) [ws2812b](#) [wemosd1mini](#) [neopixel](#) [shifter](#) [esp](#)  
[wled](#) [levelshifter](#) [powerjack](#)

It is a simple case for a Wemos D1 Mini (or a clone). A standard power jack fits in it and there is still enough space in the rear area for other components (e.g. level shifter, cable, plugs, etc.)
