Vibration dumping squash ball feet's for Ender 3/PRO/V2 printers.

Depending on your printer you may wish to print 4 standard feet's or 2 standard and 2 PSU feet.

PSU feet has additional recess for PSU cover (tested on Ender 3 V2)

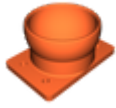

Possibly usable for any other printers.

Install using M3 and T-nuts.

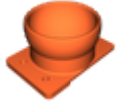

As much as this is not remix of existing design - it's hard to say it's a original idea. However I needed low profile feet's as most other ones are higher.

10-20% infill, 0.2mm, PLA
