A holder for your Teufel Control Puck with Skadis.

Update (06.10.2022):

I was not so happy with the glue-together version, and as I discovered the T-Nut system for Skadis, I redesigned this model. It's for use with these T-Nuts:

<https://www.printables.com/de/model/228663-t-nuts-for-ikea-skadis-pegboards>

or these:

<https://www.printables.com/de/model/273165-direct-screw-in-t-nuts-for-ikea-skadis-pegboards>

It now works perfectly in my opinion, and you can also screw it to any surface, if you have small enough screws.

The Puck press-fits in, so no glue or something else needed there. If your's too loose try other printing settings, or use some paper or tape to make it tighter.

(The old design with the two parts to glue together is still available, if you like it more, labeled as OLD...)

remixed from <https://www.prusaprinters.org/prints/127428-teufel-puck-control-button-helper-concept-e-450-di>
