After exhaustive testing, a very solid mount for the Thrustmaster Sparco TSS Handbrake to suit 160mm Aluminium Profile Rig.

I wanted something that could stand up to the abuse of hard shifting, and think I've now settled on a solution. Please drop me a note, or post a make if you found this useful.

Release Notes

- Version 3 - Provides additional bracing, after testing noted there was a slight amount of lateral flexing.
- Version 2 - Fine tuned tolerances for screw holes.
- Version 1 - Initial prototype.

Print Settings

- PETG, 100% In-fill, 0.30mm Layer Height
