If you don't have a 3D Printer I can make it for you from my stores on eBay and etsy

etsy -  
<http://www.16bitgamestore.etsy.com/>

eBay -  
<https://www.ebay.ca/usr/16bitvideogamestore>

Our stands come in 2 varieties, stand and kit. The Stand can be printed as is, and the kit is in 3 parts, Left, Right and Connecting bar, and it's held together with 2x 10-32 Nuts, and 2x 1/2" 10-32 Screw.

Hammer the 10-32 Nut in the side of the Legs and screw the connector bar from the bottom.

The difference between Tall and Small is the Tall can handle a GBA game in the lower slot, while the small cannot.
