Summary

air ventilation for cabinet or something else you like to come fresh air in:-)

[Household](#) > [Other House Equipment](#)

A fresh air vent for a cabinet with honeycomb

Size:

H. 200mm

W. 140mm

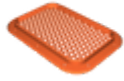

Install:

Place the vent where you want it on the cabinet, and mark it around it. After that find your router and trim the surface down the 3mm and vola. Next find some 4mm screws with pan head(not counter-sink)

and last **happy printing..**
