Dear maker,

here's my attempt for a part cooling mount that suits the Zesty Kryo. I actually use a 4010 fan for this mount and it works really good.

I've made this mount because I'm using a E3D Volcano on the Kryo and there were no mounts for part cooling available. Isn't this the beauty of 'making'? ;-)

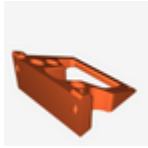

Print it, screw it and have fun with it!

Happy printing!
