Remix of the [Korg Volca](#) stand by [beejums](#). This version of the stand will hold 2 Korg Volcas. Additional supports/parts are not required to keep the Korg Volca's in place. Print 2 and slide onto each side of the devices. Originally printed using MG Chemicals Natural PETG using print settings: 0.20mm Quality, Infill: 15% infill, preset: Prusament PETG. I would suggest using PETG when printing. Example in photos was printed on the Prusa satin sheet. The object is sized to fit Prusa MK3s+ print surface.
