The 6th badge in my Season 4 Silph Arena Collection.
Nemesis Cup.

Like usual uploaded are my single colour and multicolour files.

This month I've also got the 3mf file for those who would rather use that for printing multicolour since PrusaSlicer recognises all the parts within that and allows you to print each part its correct colour while only having to input 1 file.

I've printed it in just the 0.2mm layers this month.

With 6 colours used swap out the black base with the yellow for the eyes once the 0.6mm layer is complete.
