Update:

Widen the hole a bit, making it easier to mount the toothbrush. New version do not need any supports.

Small head stand for standard electric toothbrush heads. Since the brushes tend to drip some leftover toothpaste, I included a small dripping tray to catch this.

Printed with supports using PLA on a Prusa I3 MK3s.

While PLA works fine, it will break after a couple of months. PETG is more recommended if you want it to last.

Check out <https://www.printables.com/model/376740-philips-sonicare-head-stand> if you like the model and have a Philips Sonicare head.
