updated 27. 3. 2022 | published 27. 3. 2022

Summary

3 part container with a rotary lid to keep nozzles from falling out and mixing

[3D Printers](#) > [Accessories](#)

Tags: [box](#) [container](#)

What:

Originally designed to store nozzles, I have added a plain container model without digits so you could use it also for other items

How:

Put the cover on the pot and press the pin in the butt
