Summary

Little Box to store nozzles and tools for nozzle change

This box insert is designed for [Manuels nozzle wrench](#) so you can store your nozzles and all needed tools for nozzle change on one place. You can also use this box without this insert.

Print:

I've printed with 0.3 layer height, but I recommended 0.2 layer height. I used draft settings from PrusaSlicer. You don't need any supports. I recommend support for the lid.
