The Zip Tie Mount is a simple and versatile solution for mounting almost anything using standard zip ties.

It features a flat rectangular base with **two mounting holes for Ø5 mm screws**, allowing secure installation on walls, panels, frames, or enclosures.

Between the screw holes, a **central slot** is provided to feed a zip tie through, making it easy to attach cables, hoses, tools, sensors, or other components quickly and securely.

Thanks to its minimal and universal design, this mount can be used in workshops, machines, electronics projects, or general household setups.

- No supports required

A small part with endless mounting possibilities :)
