Looking for a shelf to store my Benchy collection and although there are quite a few options however none matched the adorability of the 3D Benchy model.

So here I bring to you the Benchy Benchy Shelf

- Design inspired by the Benchy model
- Holds 5 Benchys (per tier)
- Can be wall mounted
- The tiers can be stacked
- Look at the little chimney!

Pictured models are printed in Matte White / Blue @ 0.2mm layer height, 20% infill and I used supports on the ends of the bottom part as the finish was slightly better however should print OK without.

Designed in TinkerCAD (because that's what I know right now), it took 6 versions to get to this one that I am happy to share!

Note: I'm having some tuning issues with my Matte PLA, a properly calibrated printer will print these at a much better quality
