Summary

Cable holder that uses a zip-tie to hold thick cables against the wall. Mounts with small command strip.

Remixed this awesome cable holder by Luki to a smaller size to hold my chonky cable from my Belkin power strip off the floor. I resized the design to fit my cable (should fit about 10mm diameter cable) and filled in the screw holes so I could mount it with command strips. You should be able to use the small command strips with this. Remember to press for 30 seconds and wait an hour before putting weight on it. I hold no responsibility for misuse of mounting strips! :)

This remix is based on

Kablhalterung cable holder
