### Summary

A drying rack for 4x5 sheet film.

[Gadgets](#) > [Photo & Video](#)

**New version:** Uses less material to print, but requires supports. Only takes 4 sheets, but sticking together isn't a problem. Drying area and hole is much bigger, corners dry more quickly than older version!

Older version: Takes 8 sheets, and has draining holes. Be careful when placing sheets as they will stick together if they touch. Corners take a little longer to dry than the rest of the sheet.
